

Installing VirtualBox on Kali

Upgrade your kernel version :

Run : `apt-cache search linux-image` then install the latest version. e,g:

```
apt-get install linux-image-4.8.0-kali2-amd64
```

Install the linux-headers :

```
apt-get install linux-headers-4.8.0-kali2-amd64
```

Reboot your system

remove virtualbox , then reinstall it as follows:

```
apt-get update && apt-get upgrade && apt-get dist-upgrade
apt-get install dkms
apt-get install virtualbox virtualbox-dkms
modprobe vboxdrv
```
